

Health, Safety and Environment, HSE

Services to the process industries

COWI's unique background and many years of experience qualify us to offer a wide range of HSE services to:

- The oil and gas industry, both onshore and offshore.
- The chemical process industries.
- The pharmaceutical industry.
- The transport and storage of hazardous materials.

COWI's health, safety and environmental protection specialists are internationally recognised for their comprehensive and thorough work and for the practical results they achieve. Continuous client involvement and efficient communication ensure that the results are ready for implementation.

Our general HSE philosophy:

- Integration of HSE management within the client's overall management system.
- Early implementation of HSE aspects in engineering projects.
- Management involvement leading to general staff awareness.
- Integration of HSE aspects in all phases of plant life cycle.
- Compliance with legislative requirements and proactive company goals.
- Continuous performance improvement.

COWI offers:

- Multidisciplinary consultancy services
- Efficient project management
- Many years of HSE experience
- Large pool of experts
- Strong network
- HSE training programmes.

Our HSE-services are based on:

- Large pool of experts, comprising both occupational health and safety, risk analysis and loss prevention, and environmental protection expertise.
- Co-operation with our own engineering specialists in all disciplines.
- International experience in COWI offices worldwide.
- Participation in projects for development of methods and tools for analysis, evaluation and communication.
- Work carried out for industry, government authorities, donor and financing organisations.
- Loss prevention analysis methods to optimise process equipment and operating procedures, taking account of degraded HSE performance.
